PROFESSIONAL SUMMARY

Full-stack **Software Development Engineer** (B.Tech CSE, AI & ML, 2027) with internship experience in backend data systems and **database optimization**. Builds with **Next.js, React.js, Node.js, JavaScript, Tailwind CSS** and **SQL (PostgreSQL, MySQL)**, plus Spring Boot, FastAPI and .NET. Strong in **REST API design, data integrity** and reliable systems (idempotency, retries, queues), with **AWS, Docker, Kubernetes, CI/CD** and **Git**. Takes ownership and thrives in fast-paced agile teams.

WORK EXPERIENCE

Data Engineering Intern — Emoolar Technology Pvt Ltd

May 2025 – Jul 2025 | Remote

- Built **backend data pipelines** and automation scripts in Python and C++ to transform, migrate and validate structured datasets, ensuring **data integrity** for downstream services.
- Optimized database structures** in **PostgreSQL** using indexing and normalization, improving query execution efficiency by **40%** on high-traffic tables.
- Worked in a **5-person agile team** using **Git** and **Jira** to **troubleshoot and debug** integration issues and **document technical changes**, supporting on-time delivery of customer-facing features.

PROJECTS

[GoCart — Full-Stack E-Commerce Platform](#) | Next.js, Node.js, Tailwind CSS, Redux Toolkit, Prisma, SQL | [GitHub](#)

- Built a full-stack store with **Next.js, Tailwind CSS** and **Redux Toolkit**: product browsing, cart (add, update, remove) and checkout.
- Built **REST APIs** on **Next.js API routes (Node.js)** with **idempotency and retry logic**, handling **100+ daily transactions**.
- Designed the schema with **Prisma ORM** and migrations on **PostgreSQL/MySQL**; indexing cut join query time by **50%**.
- Added secure login with **NextAuth**, a user dashboard for profile and orders, and an **admin panel** for products, users and orders.

[Inventory & Order Management System](#) | ASP.NET Core 9, C#, EF Core, SQL Server, Vue.js | [GitHub](#)

- Built a warehouse and order system on an **ASP.NET Core 9 Web API** using **Clean Architecture, CQRS (MediatR)** and the **Repository pattern**.
- Covered sales, purchase and warehouse modules: orders, returns, goods receipt, transfers, stock adjustments and stock counts.
- Secured it with **ASP.NET Identity + JWT** and **role-based access control**; validated input with **FluentValidation** and logged with **Serilog**.
- Built the UI with **Vue.js**, Razor Pages and **Axios**, plus transaction, stock and movement **reports** on SQL Server (EF Core).

[Meeting Assistant Agent](#) | Python, Agno, LLMs, Linear API, Slack API, Streamlit | [GitHub](#)

- Built an **AI agent** with the **Agno** framework and LLMs (Nebius API) that turns meeting notes into clean, readable summaries.
- Integrated the **Linear API** to auto-create tasks from action items in meeting discussions.
- Connected a **Slack bot** to post summaries of key decisions and next steps to team channels.
- Built a **Streamlit** UI with chat input; processed **10K+ transcripts** at **95% accuracy**.

[Fashion Recommendation System](#) | Python, TensorFlow, ResNet, Nearest-Neighbor Search | [GitHub](#)

- Built a **ResNet** image classifier in **TensorFlow** on DeepFashion (**289K+ images**, 50 categories, 1,000 attributes).
- Wrote a modular pipeline: preprocessing, training-time image processing, hyperparameter config and train/test scripts.
- Reached **92% top-5 accuracy**, capturing fine-grained **fabric, style and pattern** features.
- Built **nearest-neighbor** recommendations on CNN embeddings, cutting retrieval latency by **40%**.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, C#, C++, SQL / T-SQL

Frontend: React.js, Next.js, Vue.js, Tailwind CSS, Redux Toolkit

Backend: Node.js (Next.js API Routes), ASP.NET Core, Spring Boot, FastAPI, REST API Design and Documentation, Prisma ORM

Databases: MySQL, PostgreSQL, MongoDB, SQL Server, Redis, Database Optimization (Indexing, Normalization)

Cloud & DevOps: AWS, Docker, Kubernetes, GitHub Actions (CI/CD), Linux, Nginx, Kafka

Tools & AI: Git, Jira, PyTorch, Hugging Face, LangChain, RAG

EDUCATION

SRM Institute of Science and Technology — Kattankulathur, Chennai

2023 – 2027

B.Tech in Computer Science and Engineering (Artificial Intelligence and Machine Learning) | **CGPA: 8.81/10**

Relevant Coursework: Data Structures and Algorithms, Design and Analysis of Algorithms, Database Management Systems, Object Oriented Design and Programming, Advanced Programming Practice, Operating Systems, Computer Networks, Software Engineering and Project Management

Sri Chaitanya Jr College — Visakhapatnam, Andhra Pradesh

2021 – 2023

Class XII, MPC | **Percentage: 81.2%**

CERTIFICATIONS & ACHIEVEMENTS

- Codefest Technical Hackathon — 2nd Place**, SRM Institute of Science and Technology
- AWS Certified Developer – Associate** | **Meta Back-End Developer Professional Certificate**
- Oracle Certified Professional: MySQL 8.0 Database Developer** | **MongoDB Associate Developer (Node.js)**
- Microsoft:** Azure Fundamentals AZ-900, Azure AI Fundamentals AI-900, Power BI Data Analyst PL-300, Excel | **Google Data Analytics** | **OCI Generative AI**
